

RoofOfRock

Limestone as the common denominator of natural and cultural heritage
along the karstified part of the Adriatic coast

CULTURAL HERITAGE AND LIMESTONE

Appendix 3.I.1

Final report for the project area in Italy (Carso)

Annex 3.I.1.1

Representative buildings

Fabiana Pieri, Sara Biolchi

June 2015

Descriptor:	Fabiana Pieri, Sara Biolchi				
Date of fieldwork:	30.06.2013 – 20.03.2014 - 2.5.2014				
NUMBER OF OBJECT IN RoR DATABASE:	1001	Status* ¹ as heritage:	Not registered	Evidence number in Register CH:	
NAME OF BUILDING (OFFICIAL AND LOCAL):	»kraška hiša«/karstic house museum				
ADDRESS AND LOCATION:	Rupingrande/Repen 31, Monrupino/Repntabor (Trieste), Italy				
TYPE:	Profane				
SHORT DESCRIPTION OF BUILDING (GROUND PLAN, ELEMENTS, CHRONOLOGY) :	Typical karstic home with walled farmyard (“borjač”). It's a courtyard house with a stone portal gate (»kaluna«) and well in the court. Home is visible already on Franciscan cadastral map from 1819 (State Archive of Trieste, signature: 679 b 03). The house, with its agricultural buildings and the “borjac” cannot be precisely dated, but very probably dates back to the end of the XVIII century. Its present appearance is that of 1831, when the last additions were made and it was renovated. Subsequent building work was exclusively aimed at its conservation. The NAŠ KRAS cooperative society bought the building on 29.04.1968 and restored the house. The museum opened in September 1968. The project of architect Marjan Loboda from Ljubljana established to put the outside pavement, the cistern and the high yard wall. Some restoration works were done in 1999.				
USE (ORIGINAL):	Farm house		USE (CURRENT):	Museum	
PLATY LIMESTONE PRESENT IN: (AND THEIR STATE OF CONSERVATION):	Roofs of main part, pavement (inside »škrle«; outside »šeliž«), roof cornice and roof of portal gate. The roof, wooden gallery and northern façade need some restoration works.				
SPECIFIC OBSERVATIONS:					
QUARRY/EXTRACTION SITE IN THE AREA:	Quarries in the Monrupino municipality (Zolla, Repen, Sagrado). The stones for the roof restoring come from an abandoned quarry located South from Repen village				

¹National monument; local monument; only in register; not registered.

CONTACT/OWNER:	CARSO NOSTRO – NAŠ KRAS

Descriptor:	Sara Biolchi				
Date of fieldwork:	25.06.2014				
NUMBER OF OBJECT IN RoR DATABASE:	1002	Status* ² as heritage:	Registered	Evidence number in Register CH:	GN 1323 - 1.02.2006
NAME OF BUILDING (OFFICIAL AND LOCAL):	karstic house				
ADDRESS AND LOCATION:	Rupingrande/Repen 20, Monrupino/Repntabor (Trieste), Italy				
TYPE:	Profane				
SHORT DESCRIPTION OF BUILDING (GROUND PLAN, ELEMENTS, CHRONOLOGY) :	Typical karstic home with walled farmyard (“borjač”). It's a courtyard house with a stone portal gate (»kaluna«). Home is visible already on Franciscan cadastral map from 1819 (State Archive of Trieste, signature: 679 b 03). The house, with its agricultural buildings and the “borjac” cannot be precisely dated, but very probably dates back to the end of the XVIII century. Its present appearance is that of the middle of 1800, when the last additions were made and it was renovated. The Trieste Province bought the building on 8.03.1974 and restored the house in 1977				
USE (ORIGINAL):	Farm house		USE (CURRENT):	headquarters of Consortium for the Protection of the Denomination of wines "Karst"	
PLATY LIMESTONE PRESENT IN: (AND THEIR STATE OF CONSERVATION):	Roofs of main part, roof cornice and portal gate shelf. The wooden gallery need some restoration works, many elements not related to the house should be removed.				
SPECIFIC OBSERVATIONS:					
QUARRY/EXTRACTION SITE IN THE AREA:	Quarries in the Monrupino municipality (Zolla, Repen, Sagrado				
CONTACT/OWNER:	Provincia di Trieste, Area Servizi tecnici, Unità Operativa Patrimonio Gare e contratti, via S. Anastasio, 3 - 34132 Trieste				

²National monument; local monument; only in register; not registered.

Descriptor:	Fabiana Pieri				
Date of fieldwork:	30.06.2013 – 20.03.2014 – 02.05.2014				
NUMBER OF OBJECT IN RoR DATABASE:	1003	Status* ³ as heritage:	Ministerial Decree 06/08/1981	Evidence number in Register CH:	
NAME OF BUILDING (OFFICIAL AND LOCAL):	Ljenčkica's house				
ADDRESS AND LOCATION:	Trebiciano 107, Trieste, Italy				
TYPE:	Profane				
SHORT DESCRIPTION OF BUILDING (GROUND PLAN, ELEMENTS, CHRONOLOGY) :	<p>Typical »single cell« karstic home with added kitchen (<i>spahnjenca</i>) and inner oven.</p> <p>Home is visible already on Franciscan cadastral map from 1822 (State Archive of Trieste, signature: 693 a 05). The house cannot be precisely dated, but very probably dates back to the end of the XVIII century. In a 1838 “building protocol” is described as a stable with courtyard (“hlev in dvorišče”). In 1924 “Status animarum” of Trebiciano’s church the family Ljenčkica-Slavec live in this house. So perhaps it was first a stable and then, at the end of 1800 transformed in a dwelling house.</p> <p>The Slovensko kulturno drustvo Primorec bought the building on 1999 and restored the house.</p>				
USE (ORIGINAL):	Till 1999 dwelling house	USE (CURRENT):		museum and cultural center	
PLATY LIMESTONE PRESENT IN: (AND THEIR STATE OF CONSERVATION):	<p>The spahnjenca is covered with <i>skrle</i> both in platy limestone and sandstone.</p> <p>All well-preserved since recently restored.</p>				
SPECIFIC OBSERVATIONS:	<p>Preserved original volume and construction. Originally the house had two rooms, a bedroom and the kitchen. Now it has only a room.</p>				
QUARRY/EXTRACTION SITE IN THE AREA:	<p>Repen limestones: quarries in the Monrupino municipality (Zolla, Repen, Sagraado)</p> <p>Aurisina Chiara and Aurisina Fiorita: quarries at Aurisina</p> <p>Alveolinid and Nummulitid Limestones: there are some quarries in the south-eastern part of the Trieste Karst, along the road built at the foot of the Karst edge and in the municipality of Dolina.</p>				

³National monument; local monument; only in register; not registered.

CONTACT/OWNER:	Slovensko kulturno drustvo Primorec				
Descriptor:	Fabiana Pieri				
Date of fieldwork:	30.06.2013 – 05.06.2014				
NUMBER OF OBJECT IN RoR DATABASE:	1004	Status*⁴ as heritage:	National monument	Evidence number in Register CH:	
NAME OF BUILDING (OFFICIAL AND LOCAL):	Saint Rocco and Saint Sebastiano church				
ADDRESS AND LOCATION:	Santa Croce 1013, Trieste, Italy				
TYPE:	Sacral				
SHORT DESCRIPTION OF BUILDING (GROUND PLAN, ELEMENTS, CHRONOLOGY) :	<p>It's a simple small building with rectangular plan with a stone belfry above the gateway. The presbitery has a ribbed vault. Near the gateway there is a stone statue showing a <i>Mendico</i>, made by a local stone mason named Dusak.</p> <p>It was built in XVII century (1646), as a vow of escaping plague.</p>				
USE (ORIGINAL):	Church	USE (CURRENT):	Church		
PLATY LIMESTONE PRESENT IN: (AND THEIR STATE OF CONSERVATION):	Roof in platy limestone. It has been restored in 1990 putting a bituminous layer between wooden roofing and <i>skrlje</i> and now it has structural problems. It has been shored up.				
SPECIFIC OBSERVATIONS:	Preserved original volume, construction and historic inner arrangement.				
QUARRY/EXTRACTION SITE IN THE AREA:	Aurisina Limestone: quarries close to Santa Croce village Aurisina Fiorita, Aurisina Chiara: quarries at Aurisina.				
CONTACT/OWNER:	Comune di Trieste				

⁴National monument; local monument; only in register; not registered.

Descriptor:	Fabiana Pieri				
Date of fieldwork:	30.06.2013 – 05.06.2014				
NUMBER OF OBJECT IN RoR DATABASE:	1005	Status*⁵ as heritage:	monument	Evidence number in Register CH:	
NAME OF BUILDING (OFFICIAL AND LOCAL):	Assumption of the blessed Virgin parish - community's house				
ADDRESS AND LOCATION:	Col, 2 - Monrupino/Repentabor, Trieste, Italy				
TYPE:	Sacral				
SHORT DESCRIPTION OF BUILDING (GROUND PLAN, ELEMENTS, CHRONOLOGY) :	<p>Typical »single cell« karstic building, built on a rock with external stone stairs.</p> <p>It was built at the beginning of the sixteenth century in response to the Turkish raids on "karst plateau". It has been restored between 1983 and 1990 in a bad way and after a few years stone roofs collapsed. The roof have been rebuilt.</p>				
USE (ORIGINAL):	Church	USE (CURRENT):	Church		
PLATY LIMESTONE PRESENT IN: (AND THEIR STATE OF CONSERVATION):	Roofs of main part. All well preserved since recently restored.				
SPECIFIC OBSERVATIONS:	Preserved original volume and construction, preserved historic arrangement of rooms				
QUARRY/EXTRACTION SITE IN THE AREA:	<p>Repen limestone: quarries in the Monrupino municipality (Zolla, Repen, Sagrado). The stones for the roof restoring come from an abandoned quarry located in Zolla and reused stones from other roofs collapsed.</p> <p>Fior di mare: quarries in the Monrupino municipality, (Rupinpiccolo, Repen).</p>

TYPE:	sacral				
SHORT DESCRIPTION OF BUILDING (GROUND PLAN, ELEMENTS, CHRONOLOGY) :	<p>The church, with the name <i>Sancta Maria in Reyphen</i>, is described in a 1316 parchment conserved in the Capitulate Archive of Trieste.</p> <p>After the earthquake of 1511 the Bishop Pietro Bonomo consecrated - around the time when you build Karst tabor fortified to defend against Turkish invasions - the enlarged church to the Blessed Virgin Mary of the Assumption in 1512 and granted special indulgences to pilgrims.</p> <p>The three boundary walls and buildings were renovated during the same period. The ruins of the second and third walls are still visible.</p> <p>The villages around the Tabor were included in the parish of Tomaj (Tomadio). Only in 1765 these places became an independent chaplaincy. The pastor of Tomaj, Klepše, enlarged the church so that it took its present form. They built a new baroque altar and a fountain in the courtyard. In 1802 it was built today's bell tower, 19 meters high. So Tabor took its final shape.</p> <p>The solid building, with a polygonal apse, has a simple façade, which leans against the massive bell tower high on four arches, taking the architectural tradition of the Slovenian tabor of the fifteenth and sixteenth centuries.</p> <p>The interior has a single nave (14,76 x 7,27 m) receives light from rectangular windows that recall the renaissance of Santa Maria di Sesana.</p> <p>The nave is covered by a ceiling frescoed in 1912 by the</p>				

⁹⁸National monument; local monument; only in register; not registered.

	<p>painter Clemente Del Neri. This ceiling, which hides the roof trusses pitched steeply inclined, seems to be the outcome of the restructuring carried out in 1764 by Antonio Pegan. At the same restructuring must be the barrel vault of the apse.</p> <p>The triumphal arch which gives access to the apse was renovated in 1775. The apse has an elegant marble altar of 1775.</p> <p>It has been restored between 1983 and 1990 in a bad way and after a few years stone roofs collapsed. The roof have been rebuilt.</p> <p>A. Bedenčič, <i>Tabor</i>, Comune di Monrupino 2006</p> <p>G. Cuscito, <i>La chiesa dell'Assunta a Monrupino</i>, in ID. "Le Chiese di Trieste", Trieste 1992</p> <p>S. Kociančič, <i>Parochia et ecclesia B.M.V. in Repentabor</i>, in <i>Folium dioecesanum Tergestinum</i>, Trieste 1867</p>		
USE (ORIGINAL):	Church	USE (CURRENT):	Church
PLATY LIMESTONE PRESENT IN: (AND THEIR STATE OF CONSERVATION):	<p>Roof in platy limestone.</p> <p>The stones for the roof restoring are in part the original reused an in part come from an abandoned quarry located in Zolla and reused stones from other roofs collapsed.</p>		
SPECIFIC OBSERVATIONS:

NAME OF BUILDING (OFFICIAL AND LOCAL):	St. Michael the Archangel church				
ADDRESS AND LOCATION:	Sgonico 23, Sgonico (Trieste) Land register: pcn 51, FM 9 CC Sgonico, PT 650 ct 1 Coordinates: 5065548 N – 402617 E				
TYPE:	Sacral				
SHORT DESCRIPTION OF BUILDING (GROUND PLAN, ELEMENTS, CHRONOLOGY) :	<p>It seems that from the beginning of XVI century there was a small chapel, but only on XVII century, after the village enlargement, has been built the present church. In fact, the parish archive contain documents from 1613 and inside the church are preserved two tombstones, not decipherable , one of which dates back to 1701.</p> <p>Over the centuries, the original structure has certainly undergone some restoration and expansion, of which there is no written record. In times closer to us, the last major reconstructive surgery was performed after the war, as a result of the damage to the building during Second World War.</p> <p>A portal segmental arch opens the facade; the apse has a pentagonal shape and is covered with original “<i>skrle</i>”.</p> <p>Next to the main entrance of the temple, stands the tall bell tower made in stone that goes on top of a belfry with mullioned and octagonal drum dating back to 1500, probably at the time of the erection of the first church.</p> <p>The church of San Michele Arcangelo has a single nave, which looks completely white. In the apse of the Gothic style, a Baroque high altar with marble statues and an icon of Christ.</p>				
USE (ORIGINAL):	Church	USE (CURRENT):	Church		
PLATY LIMESTONE PRESENT IN: (AND THEIR STATE OF	Apse roof in platy limestone. All well-preserved since recently restored.
